Neighborhood Explorer

Grab your hiking gear and start an adventure outside!
Discover your neighborhood with a friend or parent and see how many questions you can answer below!

Tally how many different birds you see. What are they feeding on? Are they in trees, on the ground, or ledges?

Find evidence of insects under rocks, leaves, or on tree bark. Look for what might eat insects.

Sketch different types of trees. What effect do they have on houses, animals, and wind?

Observe any traces of water in the area or observe flowing water. Is there evidence of erosion? Who/what is using the water?

Find signs of wildlife. Example: paw prints, nests, feathers, and fur. Look under rocks and leaves too! Try to guess the animal.
