6" - 8"

Tracks aren’t to scale
Track length is frequently helpful to I.D. animals, and the ruler can be used to measure tracks in the field. Appearance of tracks will vary depending on the surface (soil, snow, sand, etc.) and the movement of the animal.
Canine vs. Feline

**Top 2 toes are at even**

**Claw marks**

- 2 lobes

1 lobe

**2 lobes**

- There are 3 lobes, but the center lobe is shorter than the other 2

- Coyote 2 ¼" - 2 ½"
